

Understanding the Standard for Disaster Management in Queensland

Prompt Sheet: Indicators of Outcome 7

IP7

Capability integration

Capability integration involves entities building their capabilities together in a way that complements existing capability within the community. Capability integration is dependent on a shared understanding of the goals that guide the sector, and the ability to share and manage resources appropriately.

Outcome 7: Resources are prioritised and shared with those who need them, when they need them

The following questions are intended to be used as prompts for entities to think about how the Indicators of this Outcome might apply to their own circumstances.

Resources

Entities are aware of their own and others' resources and their availability

- Does your entity know what resources it has, and whether they are available for use?
- Is your entity aware of the resources that others have, and whether they are available for use?

Entities understand how resources can be accessed and integrated

- How can your entity's resources be accessed?
- How can your entity access other entities' resources?
- Does your entity know how different resources can be integrated with existing resources, both their own and other entities'?

Entities know which of their own resources other entities may require

- Has your entity engaged with other entities to determine which resources they may ask to share or borrow?
- Has your entity engaged with other entities to determine the different ways they may be asked to assist, and which resources these might require?

Entities coordinate and manage resources

- How does your entity coordinate the use of resources?
- Does your entity have a resource management system that includes resources used for disaster management?
- Does your entity include and consider resources in their resource management system that are not primarily used for disaster management, but which can be used in different ways?

Entities understand the capability limits of available resources

- Has your entity tested the available resources to determine the extent of their capability?
- Does your entity understand and abide by the capability limits of available resources?

Entities make relevant plans, procedures, and other documents and resources available to other entities

- Has your entity engaged with other entities to determine which plans, procedures, and other documents may be useful to them?

- Does your entity share the plans, procedures, and other documents that may be useful to other entities?

Information

Entities source, verify and share relevant intelligence products with other entities

- How does your entity source and verify intelligence products?
- How does your entity share relevant intelligence products with other entities?

Entities understand their own information requirements

- Has your entity investigated and determined their own information requirements?
- What information does your entity need in relation to disaster management?

Entities share current, relevant information

- Does your entity share information?
- How does your entity ensure that the information that it shares is current and relevant?

Entities can securely store and share sensitive data

- How does your entity manage sensitive data?
- Does your entity have a secure way to store sensitive data?
- Does your entity have a secure way to share sensitive data?
